

Subject: Prime Audiology - Website Final Requirements & Client Feedback

Hi

Thanks for the initial sample link (<https://prime-audiology.onrender.com/>). We have just reviewed the final requirements and competitor references with the client.

Moving forward, the website must strictly adhere to the Prime Audiology **Brand Book** (Montserrat for headings, Nunito Sans for body, Deep Navy and Bright Blue color palette). Because the target demographic is 60+ seniors, the UX must feature high contrast, large text (minimum 16px body), and a sticky header with the phone number clearly visible.

<https://www.smarthearing.au/>

https://audiencehearing.com.au/?utm_source=gbp&utm_medium=profile

https://essenceaudiology.com.au/?utm_source=gmb&utm_medium=organic

<https://hearingconsultants.com.au/>

Please review the finalized Sitemap and Feature Requirements below based on the client's direct requests.

1. Sitemap & Navigation Structure

Based on the client's reference (Image 1), the main navigation must include:

- **Home**
- **About Us** (Include George Sebastian's bio)
- **Services** (Drop-down for Ear Wax Removal, Home Visits, etc.)
- **Hearing Aids** (Drop-down menu below)
 - Styles & Types
 - Price & Technology
 - Pensioners & HSP Eligibility
- **Blog**
- **FAQ**
- **Contact Us** (With clear CTA for "Request Appointment" and Phone Number)

2. MUST-HAVE Features (Core Client Requirements)

These items must be built into the site structure as requested by the client:

- **Price & Technology Matrix:** We need a clean, easy-to-read table comparing technology levels (e.g., Standard, Essential, Advanced, Premium, Elite) to Lifestyle Aspects (Quiet environments, active social life, etc.). *Reference: See attached HearTEK images 2, 3, and 4.*

Hearing Aid Technology Levels

Hearing Aids come in five different technology levels, each designed to match different listening environments and lifestyles.

Technology level	Lifestyle Aspects
Standard	Best for quiet environments and simple listening needs.
Standard Plus	Everything that Standard technology has to offer with the added benefit of being rechargeable.
Essential	Ideal for people who spend most of their time in familiar, low-noise environments.
Advanced	A balanced option offering improved speech understanding in social and outdoor environments.

2:52

VoLTE 4G 32%

Essential	Ideal for people who spend most of their time in familiar, low-noise environments.
Advanced	A balanced option offering improved speech understanding in social and outdoor environments.
Premium	Offers excellent speech clarity even in busier settings such as restaurants or family gatherings.
Elite	Best in class performance across all listening situations

During your hearing assessment, your audiologist will help you understand which technology level best suits your daily life and communication needs.

Standard Inclusions with All Hearing Aids Purchased at HearTEK

All HearTEK hearing aids include comprehensive care and support services

- **Hearing Aid Styles Section:** A visual grid showing the different types of hearing aids (BTE, RIC, ITE, ITC, CIC, IIC) with clear images. *Reference: See attached SmartHearing image 6.*

My Aged Care Plans

If you are on a My Aged Care plan and have a hearing loss, you may be able to use part of this package to fund hearing devices and accessories.

Please call Hear and Clear Care to discuss this option further.

Medicare

Hear and Clear Care is registered with Medicare. If you are on a Chronic Disease Management plan from your General Practitioner or have a referral from an ENT specialist or Neurologist, you may be eligible for a Medicare rebate.

Private Health Insurance- HICAPS

If you have private health insurance with a certain level of extras, you may be eligible for a rebate on hearing tests, services and aids. Hear and Clear Care has a HICAPS facility so we will be able to check this rebate for you or otherwise you can contact your health insurance provider who will also be able to inform you.

Self-funded

If you are not eligible for any of the other funding options, there will be costs associated with hearing test and hearing aids.

Appointments & Booking Integration (Core Requirement) The appointment booking process must be completely frictionless and cater to our two distinct audiences: Seniors (who prefer to call) and Adult Children (who prefer to book online).

- **Global Visibility:** A "Request Appointment" CTA button and the clinic's phone number must be permanently visible in a sticky header across all desktop and mobile pages.
- **Dedicated Booking Page:** Create a dedicated "Book Appointment" page.
- **Dual Booking Options:** The booking page must clearly offer two paths:
 1. **Call the Clinic:** Display the phone number in large, clickable text (tel: link) for mobile users.
 2. **Book Online:** Provide a space for an embedded booking widget.
- **Fallback Form:** Until the client provides their specific booking widget code, please build a clean, highly legible fallback contact form (Fields: Name, Phone, Email, Preferred Date/Time, and a drop-down for "Reason for visit: Hearing Test, Ear Wax Removal, Hearing Aid Fitting, Other"). Form submissions must route to admin@primeaudiology.com.au.

- **Email & Domain Setup:** Ensure forms are routed to:
GEORGESEBASTIAN@primeaudiology.com.au and
admin@primeaudiology.com.au.

3. NEGOTIABLE / COMPLEX Features (How to handle these)

The client requested some complex multimedia features. Here is how we want them executed to maintain site speed and budget:

- **"Motion 360-degree 3D interactive pictures of products":**
 - *Instruction:* Do not custom-build 3D models. Please utilize official iFrame/embed codes provided directly by manufacturers (like Phonak or Starkey) if they offer 360-degree widgets. If manufacturer widgets are unavailable, fallback to high-quality GIFs or hover-state image flippers to simulate the 360 effect without heavy code.
- **"How hearing aids work video (sound production to brain)":**
 - *Instruction:* We do not need custom animation. Please source a high-quality, professional educational video from YouTube (preferably from a major brand like Phonak or an official medical channel) and embed it cleanly into the "Your Hearing" or "About" page.
- **Specific Products (Phonak Infinio Ultra, Starkey, etc.):**
 - *Instruction:* Create a "Featured Technology" or "Latest Releases" section on the Hearing Aids page that highlights these specific models using high-res images and summaries derived from the links the client provided.

4. Compliance Note

As this is an Australian medical website, it must comply with AHPRA guidelines. **Do not include patient testimonials** anywhere on the site, and avoid language that "guarantees" a cure for hearing loss.

Please let me know if you need any clarification on these requirements or if you foresee any technical roadblocks with the 360/Video embeds.
